

BONE GRAFTING

Tooth loss, even with socket grafting, always results in some bone loss. Bone loss accelerates with time and with use of removable prosthesis. As a result of this phenomenon, bone grafting and dental implants go hand in hand. Practice of implant dentistry must be paired with some skill and knowledge in bone grafting.

The vast array of bone graft techniques and materials have created complexity and confusion. This course is a summary of bone grafting concepts and categorization of materials to help you navigate and evaluate bone graft materials, instrumentation and techniques.

This course is both for the dentist practicing implant prosthetics and also for the dentist practicing implant surgery. Learn basic bone grafting concepts and easy techniques that you can integrate into your practice immediately. There will be a hands on portion on socket grafting.

At the completion of this course, participants will be able to understand:

- How to choose a bone graft material and GBR barrier
- Anatomic considerations for flap design, soft tissue management and bone preservation
- Keys to successful socket grafting and when to do it

Course Fee: \$895.00+ tax.

June 1-3, 2017 Saskatoon, SK

July 6-8, 2017 Comox, BC

November 2-4, 2017 Sudbury, ON

November 16-18, 2017 – Halifax, NS

AVINENT™
Implant System

Dr. Fred Li

Dr. Frederick Li graduated from the University of Manitoba College of Dentistry. Desiring to further his dental education and experience, Dr. Li moved to New York City and completed two years of dental residency in hospital facilities associated with Cornell Medical Center and Columbia University. Dental implantology was a focal component of the post-graduate training, enabling Dr. Li to gain surgical implant experience from some of the top implant surgeons and prosthodontists in the Greater New York Region.

Dr. Li is also a graduate of the Misch Implant Institute and was awarded a fellowship by the International Congress of Oral Implantologists. Dr. Li limits his practice to surgical and prosthetic dental implants in Vancouver. He gives courses on a variety of implant topics along with mentoring a large surgical implant study club.
