

Objectives

To ensure confidence in planning and treating small edentulous areas with dental implants from surgical placement to the final restoration.

Benefits

- small group for personalized training (limit of 8 attendees)
- completely practical and 80% in-office (mentor's) for over-the-shoulder training
- immediate application of the techniques and concepts for a shorter learning curve
- treatment plan your first case
- opportunity to treat your first case with one-on-one help from the mentor

About the Mentor

Dr. Frederick Li graduated from the University of Manitoba College of Dentistry. Desiring to further his dental education and experience, Dr. Li moved to New York City and completed two years of dental residency in hospital facilities associated with Cornell Medical Center and Columbia University. Dental implantology was a focal component of the post-graduate training, enabling Dr. Li to gain surgical implant experience from some of the top implant surgeons and prosthodontists in the Greater New York Region.

Dr. Li is also a graduate of the Misch Implant Institute and was awarded a fellowship by the International Congress of Oral Implantologists. Dr. Li limits his practice to surgical and prosthetic dental implants in Vancouver. He gives courses on a variety of implant topics along with mentoring a large surgical implant study club.

Surgical Implant Mentorship Program

Featuring:

Supervised surgery on your own patient with the Avinent Implant System

Saskatoon, SK - June 1-3, 2017
Comox, BC - July 6-8, 2017
Sudbury, ON - November 2-4, 2017
Halifax, NS - November 17-19, 2017

Dental Implantology

Dental implants have been successfully used for 35+ years and have now become the STANDARD OF CARE. With limited exposure to implant dentistry in dental school, introducing and growing oral implantology into your practice is a challenge. The Surgical Implant Mentorship Program has been designed to offer practitioners personalized training for efficient and confident learning. You will be able to place and restore implants immediately after your training.

Program

DAY 1: 8:00am - 4:00pm

- Introduction to the equipment
- Intensive day of model surgery on anatomic models featuring simulated soft tissue, bone topography, and anatomic landmarks
- Treatment planning for posterior single tooth replacement
- Each attendee to bring xrays and models of their case
- Group case discussion and treatment planning
- Short lecture on surgical stents and surgical logistics

DAY 2: 8:00am - 4:00pm

- Demonstration Surgery
- Surgery day – Course attendees to perform surgery on their own patients with assistance from the mentor

DAY 3: 8:00am - 4:00pm

(Staff recommended to attend morning portion)

- Rationale behind dental implants
- Doctor and staff training (sterilization/setup/marketing)
- Continuation in afternoon:
Surgery day – Course attendees to perform surgery on their own patients with assistance from the mentor
- Review of surgeries

Tuition

\$2,995.00 + gst

(includes course materials and sterile pack for surgery)

18

CE Credits available

Opportunities for continued participation

Cancellation Policy

A full refund will apply to cancellations with 30 or more business days notice. Less than 30 working days notice, will result in a "no" refund.

Testimonials

"Practical Knowledge without the BS!"

Dr. Mike Chen, Vancouver, BC

"Practical, pertinent and ready to use immediately.

Excellent Course." **Dr. Art Ross, Vancouver, BC**

"I found your course outstanding. The course was well-organized and carefully guided me into my first implant placement. The learning environment was very friendly and I feel confident to now place implants in simple cases at my own office." **Dr. Jessey Minhas, Prince George, BC**

"Most practical implant surgical instruction course I have taken, and Dr. Li is not only a good experienced implant surgeon, but also an out-standing teacher and mentor."

Dr. James Hsia, Richmond, BC

"This was a great introduction to implants. I can't wait to learn more." **Dr. Terry Godinho, North Vancouver, BC**

"It was great having a relaxed atmosphere with a small group. This course was perfect as an introduction for beginners to implant dentistry. The lecture dates were spaced very well so that we had finished it in a short span of time without it being too busy." **Dr. Ed Lawson, Hope, BC**

"Excellent course. Very practical knowledge directly applicable to practice situations immediately."

Dr. Ajit Basi, Burnaby, BC

FACT: The majority of CE courses are based on lecture components and occasionally hands-on simulated dentistry.

FACT: If dental school involved only lectures and dentalform work, graduates would not feel comfortable practising dentistry.

FACT: The options available for CE courses on dental implantology have never been greater. The Surgical Implant Mentorship Program has a proven track record and is a unique opportunity combining lectures, model surgeries, and one-on-one mentor-assisted surgeries on your own patients.
